2 USL rated process.xls
3 LSL rated process.xls

SUBFolder(s): PlanDoCheckAct

File(s): PDCA.xls

SUBFolder(s): ImplementationofInstructions

File(s): Implementation of Instructions.doc

Hi,

Getting familiar with the project.

I would suggest you, to start with the “**START – Folder**” and therefore the file “**Find the root cause.doc**”.

It is more or less, self explaining because there are many links within this document which will guide you through the Project “**Structured Improvement with Strategy**”.

Please read this **License, Disclaimer, Info - Readme doc.txt** careful also because it contains help, suggestions and legal information.

Foreign files downloaded from the Internet and implemented into the content of this project (not created by me):

Each text file is kept in its original version.

Pictures might be modified by me (e.g.: brightness, color, size) to fit into my design. The source where it came from is added near by the file or the file might be directly linked to its source so its source can be found easily and traced back to the place where I found the file.

Problems to open certain files:

In case you can not open a file, just save the folders on your desktop to reduce the length of the path.

The path length is limited to a certain length or to a certain amount of characters.

Do not change file names or the location of files.

In case you change names and locations, links will not work any more.

Macros:

The Excel files are containing Visual Basic MACROS. you need to enable MACROS, otherwise some functions will not work.

Disclaimer:

The content of the folders, files, documents
or single components may not fit your scope or processes.
We do not take responsibility in any kind
for results out of usage.
